ARKANSAS, Central and North Central

Newton County

Compton **05** **2040CST** **0** **0** **Thunderstorm Wind (EG50)**
Thunderstorm winds downed some large tree limbs.

Baxter County

Three Brothers **05** **2135CST** **0** **0** **Thunderstorm Wind (EG50)**

Baxter County

8 NE Bigflat **05** **2150CST** **0** **0** **Thunderstorm Wind (EG50)**
Thunderstorm winds downed a number of trees and large tree limbs.

Fulton County

3.1 E Moko to **05** **2159CST** **5.4** **250** **0** **1** **Tornado (F1)**
4.7 NE Camp **2206CST**

A weak tornado touched down briefly in Fulton County, about 3 miles east of Moko. Estimated winds with the tornado were about 110 mph. A house had shingles off, a broken window and the porch was shifted.

One person in the house sustained minor injuries from flying debris. Another house had broken windows and several outbuildings were destroyed. Farm machinery was overturned and several vehicles sustained damage. Numerous trees were downed or snapped off along the path of the tornado. The tornado was on the ground almost five and a half miles before dissipating.

Sharp County

Center **05** **2235CST** **0** **0** **Thunderstorm Wind (EG50)**
Trees down.

Sharp County

1 SW Sitka to **05** **2241CST** **4.8** **350** **0** **3** **Tornado (F2)**
4 ENE Sitka **2248CST**

In the picture: A strong (F2) tornado downed a tree through a house 3 to 4 miles east-northeast of Sitka (Sharp County) on 11/05/2005.

A strong tornado touched down briefly in Sharp County about a mile southwest of Sitka. Estimated winds with the tornado were about 115 mph. The worst damage noted was at the intersection of Lone Oak Road and Summerfield Creek Road. One mobile home was demolished, with contents strewn well across a field. Another mobile home was damaged. A storage shed was thrown across a street into the trees and a travel trailer was overturned. A vacant house was destroyed by falling trees. Five vehicles were damaged with windows being blown out. Numerous trees were uprooted or snapped off along the path of the tornado. Three people sustained injuries. The tornado was on the ground for almost five miles before dissipating.

4 NNE Welsh to 7.5 NE Welsh	27	1649CST 1656CST	4.5	40	0	0			Tornado (F1)
--------------------------------	----	--------------------	-----	----	---	---	--	--	---------------------

A weak tornado was spawned in southeastern Montgomery County about 4 miles north-northeast of Welsh. The tornado tracked quickly to the northeast, and caused mostly tree and power line damage. The tornado continued into southwestern Garland County.

Garland County

5.5 SW Crystal Spgs to 2 SW Crystal Spgs	27	1656CST 1701CST	3.5	40	0	0			Tornado (F1)
---	----	--------------------	-----	----	---	---	--	--	---------------------

A weak tornado moved into southwestern Garland County from Montgomery County. The tornado caused mostly tree and power line damage and also destroyed a hay barn. The tornado dissipated around 2 miles southwest of Crystal Springs.

Garland County

2 N Bear to 3 NNE Bear	27	1710CST 1711CST	1.2	50	0	0			Tornado (F1)
---------------------------	----	--------------------	-----	----	---	---	--	--	---------------------

A weak tornado touched down briefly about 2 miles north of the town of Bear. Winds were estimated to be around 80 mph. It appears the tornado formed on a slope leading down to Lake Ouachita. Damage along the path of the tornado consisted of uprooted and snapped trees along a hillside, with boat docks pushed outward away from shore. The pushing caused the dock moorings, which are normally vertical, to lean. The tornado likely went into Lake Ouachita as a waterspout for a brief period of time before dissipating about 3 miles north-northeast of Bear.

Hot Spring County

3 SE Bonnerdale to 4.8 ENE Bonnerdale	27	1720CST 1726CST	4.2	100	0	0			Tornado (F2)
--	----	--------------------	-----	-----	---	---	--	--	---------------------

A strong tornado was spawned in western Hot Spring County around 3 miles southeast of Bonnerdale and tracked quickly to the northeast. The tornado caused mainly tree and power line damage before moving into southwestern Garland County.

Van Buren County

.8 ESE Chimes to 2.5 NE Chimes	27	1723CST 1727CST	2.8	50	0	0			Tornado (F1)
-----------------------------------	----	--------------------	-----	----	---	---	--	--	---------------------

A weak tornado touched down over the northwest corner of Van Buren County, about a mile east-southeast of Chimes. Winds were estimated at 80 mph. The tornado destroyed a barn, shop and storage shed. A number of power poles and power lines were blown down. The tornado moved northeast into Searcy County.

Garland County

ARKANSAS, Central and North Central

Conway County

9 WSW Morrilton to 3.5 SSW Blackwell 27 1737CST 1742CST 3.9 250 0 0 Tornado (F2)

A strong tornado touched down in southwest Conway County, about 9 miles west-southwest of Morrilton. Winds were estimated at 125 mph. Damage consisted of several damaged or destroyed outbuildings and a few homes with minor roof damage. A number of trees were also blown down. The tornado moved northeast into Pope County.

Perry County

11 SW Thornburg to 3 NE Perry 27 1741CST 1800CST 19 800 0 0 4M Tornado (F3)

In the picture: The WSR-88D (Doppler Weather Radar) indicated a hook echo approaching Cherry Hill (Perry County) from the southwest around 550 pm CST on 11/27/2005. To sample the storm, the radar sends energy...which is reflected back if there is precipitation. In this case, the radar detected a high level of reflectivity in the hook, which often means that debris is present.

A strong tornado touched down over southern Perry County. Winds were estimated at 160 mph. The tornado initially tracked through the Ouachita National Forest where hundreds of trees were either snapped off or blown down. Once emerging from the forest area, the tornado downed eleven large steel towers on a 500 kilovolt power line. As the tornado continued tracking to the northeast, a sawmill was destroyed, along with several houses. Several dozen other houses sustained damage and several mobile homes were overturned. Numerous vehicles were damaged or destroyed, as well as a number of barns and outbuildings. Several chicken houses also sustained damage. Numerous trees and power lines were also downed. The tornado eventually moved into Conway County.

Pope County

5 SSE Atkins to 5 SE Atkins 27 1742CST 1745CST 2.3 250 0 0 Tornado (F2)

A strong tornado moved out of Conway County and into Pope County about 5 miles south-southeast of Atkins. The tornado tracked across a rural part of the county with damage consisting of numerous downed trees and power lines. The tornado continued moving northeast and moved back into Conway County.

Conway County

1 SW Blackwell to 2.5 NE St Vincent 27 1745CST 1800CST 11.8 250 0 0 Tornado (F2)

ARKANSAS, Central and North Central

In the picture: A strong (F2) tornado heavily damaged a liquor store in Blackwell (Conway County) on 11/27/2005.

The strong tornado moved out of Pope County and back into Conway County about one mile southwest of Blackwell. The tornado moved to the northeast, downing three wooden 115 kilovolt power structures. As the tornado crossed Interstate 40, it destroyed a liquor store at Blackwell. The tornado continued moving northeastward, damaging several houses. Several outbuildings were damaged or destroyed. Numerous trees and power lines were also knocked down. The tornado dissipated about 2.5 miles northeast of Saint Vincent.
